A Dictionary of Scientific Quotations Alan L. Mackay 2019-04-04 Science affects us all-in the words of Albert Einstein, "The whole of science is nothing more than a refinement of everyday thinking." It is therefore fascinating to discover the thoughts of scientists, philosophers, humanists, poets, theologians, politicians, and other miscellaneous mortals on this most important of subjects. A Dictionary of Scientific Quotations is a personal selection of scientific quotations by Professor Alan L Mackay that includes graffiti, lines of song, proverbs, and poetry. Whether you believe that "All problems are finally scientific problems" (George Bernard Shaw) or that "Imagination is more important than knowledge" (Einstein), it is without doubt that "It is a good thing for an uneducated man to read books of quotations" (Churchill). You will be charmed and delighted by this collection and remember, "'Why,'" said the Dodo, "'the best way to explain it is to do it'" (Alice in Wonderland, Lewis Carroll).

Designing for the User Experience in Learning Systems

Evangelos Kapros 2018-09-25 While the focus of the UX research and design discipline and the Learning Sciences and instructional design disciplines is often similar and almost always tangential, there seems to exist a gap, i.e. a lack of communication between the two fields. Not much has been said about how UX Design can work hand-in-hand with instructional design to advance learning. The goal of this book is to bridge this gap by presenting work that cuts through both fields. To illustrate this gap in more detail, we provide a combined view of UX Research and Design & Educational Technology. While the traditional view has perceived the Learning Experience Design as a field of Instructional Design, we will highlight its connection with UX, an aspect that has become increasingly relevant. Our focus on user experience research and design has a unique emphasis on the human learning experience: we strongly believe that in learning technology the technological part is only mediating the learning experience, and we do not focus on technological advancements per se, as we believe they are not the solution, in themselves, to the problems that education is facing. This book aims to lay out the challenges and opportunities in this field and highlight them through research presented in the various chapters. Thus, it presents a unique opportunity to represent areas of learning technology that go very far beyond the MOOC and the classroom technology. The book provides an outstanding overview and insights in the area and it aims to serve as a significant and valuable source for learning researchers and practitioners. The chapter "User requirements when designing learning e-content: interaction for all" is available open access under a CC BY 4.0 license at link.springer.com
