Corporate Management in Developing Countries Alvin G. Wint 1995 Managers in developing countries, whether operating in the private or public sectors, are constantly aware of the problems of underdevelopment. Effective management of international business activities in developing countries can improve the competitiveness and development prospects of these countries and, in turn, the companies operating within them. But to do so, managers need a developing country perspective on international trade agreements, international finance, foreign exchange, and national financial management. These topics, as well as practical chapters on the management of export production, financing exports, government export programs, and international investment make this very valuable reading for

executives and those interested in international business.
