One Version of the Facts Henry E. Duckworth 2000-10-12 In his engaging memoirs, *One Version of the Facts: My Life in the Ivory Tower*, Dr. Henry Duckworth takes readers from his student days in Winnipeg and Chicago in the 1930s to his time as president of the University of Winnipeg (1971-1981) and chancellor of the University of Manitoba. An accomplished physicist, he wrote the first definitive text in English on mass spectroscopy, discovered the last stable isotope (platinum), and helped create important programs at universities and at the National Research Council. He also served on numerous councils for scientific and university organizations, and rubbed shoulders with Nobel Prize winners at international conferences. With humour and modesty, Henry Duckworth recalls trends, changes, and crises he witnessed throughout his long university career. He offers his observations, his opinions, his "version of the facts," providing a special insight into critical years in Canada's university education history, as well as his own specialty, atomic research.

Florida Scientist 1991

Contributions from Science Education Research Roser Pintó 2007-09-19 In August 2005, over 500 researchers from the field of science education met at the 5th European Science Education Research Association conference. Two of the main topics at this conference were: the decrease in the number of students interested in school science and concern about the worldwide outcomes of studies on students' scientific literacy. This volume includes edited versions of 37 outstanding papers presented, including the lectures of the keynote speakers.

Library Journal 1980 Includes, beginning Sept. 15, 1954 (and on the 15th of each month, Sept.-May) a special section: School library journal, ISSN 0000-0035, (called Junior libraries, 1954-May 1961). Also issued separately.

Exceptionally Gifted Children Miraca U. M. Gross 2003-12-16 *Exceptionally Gifted Children* is unique. The first edition of this book, published in 1993, introduced 15 remarkable children, some of the most gifted young people ever studied, and traced their path through school, exploring their academic achievements (and in some cases enforced underachievement), their emotional development, their social relationships and their family relationships and upbringing. This new edition reviews these early years but also follows the young people over the subsequent ten years into adulthood. No previous study has traced so closely and so sensitively the intellectual, social and emotional development of highly gifted young people. This 20 year study reveals the ongoing negative academic and social effects of prolonged underachievement and social isolation imposed on gifted children by inappropriate curriculum and class placement and shows clearly the long lasting benefits of thoughtfully planned individual educational programs. The young adults of this study speak out and show how what happened in school has influenced and still influences many aspects of their lives. Miraca Gross provides a clear, practical blueprint for teachers and parents who recognise the special learning needs of gifted children and seek to respond effectively.

Canadian Aeronautics and Space Journal 1964

Fostering Academic Excellence J. McLeod 2013-10-22 This book contains a general introduction to the education of academically able students. It provides a solid background of basic knowledge and a survey of research and theory for educational theorists, student teachers, practising teachers, administrators and planners. It offers insights into relevant practical problems as well as guidelines for classroom practice. The significance of this material is outlined for the various levels of the educational system from the individual classroom to the regional planning level. The book is not, however, designed to offer set answers and pat solutions, but to provide rationale for the creative work of teachers and administrators.

University English for Academic Purposes in China Xiaofei Rao 2018-07-07 This book uses an in-depth, phenomenological interview approach to explain the generational characteristics of today's Chinese university youths and the critical dispositions they believe indispensable in acquiring English as an academic language in and outside school settings. By presenting the authentic voices of the recruited participants, the book clarifies how English for academic purposes (EAP), as an emerging global phenomenon and a research-informed practice, enables and empowers them for conscious self-

transformation and critical awareness development through language study. The book also explores issues arising in the fields of general English language teaching as well as traditional and critical EAP, and discusses university English language learners' learning needs and rights. The book further promotes a dynamic and transformative University EAP pedagogy of particularity, practicality, and possibility moving from the oppression of language education to its liberation, and the increasing critical consciousness among the present and future university youths in a time of great social changes.
