The Future of Petroleum in Lebanon

Sami Atallah 2019-09-19 What is the

future of the oil and gas sector in

Lebanon? Following the recent

discovery of these valuable resources

in the southern Mediterranean,

including in the Cypriot and Israeli

offshore reserves, the possibility of

Lebanon also becoming a petroleum-

producing country has been raised.

This collection of essays addresses

the major challenges and

opportunities that accompany the

country's hope to join the petroleum

club. Covering the key policy issues

- from Lebanon's susceptibility to

the oil curse, to the environmental

risks of production - this book

brings together expert analysis to

offer answers at the institutional

level. Of central importance, the

contributors argue, is that for

Lebanon to benefit from the discovery

of petroleum, it must first reform

its institutions with the full

support of the voting public and

civil society. Combining rigorous

quantitative and qualitative

research, the Lebanese Center for

Policy Studies has produced here an

essential book that puts petroleum in

Lebanon, and the important questions

that come with it, within a global

perspective.
