Edie West 2019-11-01
This book provides a historical analysis of the Frontier Nursing Services in the Eastern Appalachians of the United States, as well as a review of the oral history tradition of former frontier and non-frontier nurses. The data was gathered from 2003 to 2007, and the historical part covers the years 1900 to 1970. The objective of the study presented here was to conduct interviews with former frontier and non-frontier nurses in order to better understand their family and personal relationships, and the experiences that motivated their career choices. These interviews also give a voice to the working and middle-class women of the FNS. The emerging themes include moral inhabitability in work/education

environments, the generational mix, nurse-physician and male-female relationships at the workplace, the role of technology, humanitarian versus financial rewards, and the public image of nurses. In addition, the book examines how the FNS shifted from a community/grass-roots structure to the corporate/business model of healthcare delivery employed today. In closing, it stresses the importance of exploring past nursing in order to better grasp present nursing. It also represents a testament to the professional work and vital contributions of frontier nurses.

How Management Programs Can Improve Organization Performance Richard E.

Crandall 2015-02-01 All organizations operate in an environment that is rapidly changing. To be successful, the organization must also change. The question is what to change and how. acronyms, such as Just-in-Time (JIT) or Service-Oriented Architecture (SOA). A management program is designed to improve an organization's effectiveness and efficiency. However, there are so many management programs it is often difficult for managers to decide which one would be most appropriate for their operation. This book will describe an array of management programs and group them to indicate their primary purpose. The book will also outline a process that will enable managers to select the most appropriate management program to meet their immediate and long-term needs. Implementing a management program is no small task. It can be expensive, time-consuming, and disruptive of normal

operations; therefore, the choice of the management program requires careful selection and implementation. Care must be taken to increase the likelihood of successfully implementing new ventures in all types of organizations – business, nonprofit and governmental agencies. Many ventures fail, or achieve limited success, not because the idea isn't good but because the organization has not adequately prepared its internal capabilities to meet the environmental conditions in which it operates. An important feature of this book is that it can be updated periodically to add new programs and phase out programs no longer relevant. The book will provide readers with a comprehensive description of the most popular management

improvement programs and their primary applications to their organizations. We will discuss the philosophy and principles of these programs and include a discussion on how to use each program to achieve optimum success. A central theme of this book is to not just adopt an improvement program for the sake of adopting it, but to match the improvement program with the specific needs in an organization. In the chapters that follow, we will illustrate how this matching process can be conducted. Above all, we plan the book to be a concise and useful resource to both practitioners and academics. Here is what you can expect in the chapters.

Existing narratives about how we should organize are built upon, and reinforce, a concept of 'good management' derived from what is assumed to be a fundamental need to increase efficiency. But this assumption is based on a presentist, monocultural, and generally limited view of management's past. A New History of Management disputes these foundations. By reassessing conventional perspectives on past management theories and providing a new critical outline of present-day management, it highlights alternative conceptions of 'good management' focused on ethical aims, sustainability, and alternative views of good practice. From this new historical perspective, existing assumptions can be

countered and simplistic views disputed, offering a platform from which graduate students, researchers, and reflective practitioners can develop alternative approaches for managing and organizing in the twenty-first century.

turbulent times, project organisations face severe challenges. Despite the advancement of project management tools and techniques, the rate of project failure exceeds that of success. Regardless of calls for further empirical studies on the role of project leadership, researchers struggle to find the best leadership styles for project success. New digital transformation phenomena have forced organisations to offer more autonomy and decision-making authority to those at lower hierarchical levels. In this scenario, top management support plays a facilitator role. To the best of the researcher's knowledge, no past studies have examined these critical project success factors simultaneously in a project environment.

Embedded in the theories of contingency, goal-setting, and social cognition, this study raised the hypothesis that project managers' leadership styles impact project success via the mediation of goal clarity, empowerment, and self-leadership as well as the moderation of top management support. Data was collected by administering a cross-sectional survey to 289 project organisations in the IT sector. The results demonstrated that project managers' transactional leadership style does not impact project success because goal clarity has an insignificant association with project success. However, the transformational leadership style showed a positive impact on project success because empowerment significantly and

positively relates to project success. The project manager's empowering leadership style was also found to positively influence project success through followers' self-leadership. Additionally, top management support revealed a significant moderating role by strengthening the relationship between empowerment and project success. This study successfully fills theoretical gaps by introducing a novel moderated mediation model. The findings also offer useful insights to practitioners by revealing that project managers' transformational leadership and empowering leadership are needed to enhance and encourage employee empowerment and self-leadership, and ultimately secure

project success.

Throughout the book is a continuing project in which the reader is put in the position of owning their own business and must think and make decisions about what the chapter has discussed. The book combines Anglo-American and German approaches to management and management studies, making it a valuable resource both for those who are studying management and those who are working as managers. management accounting practices provide very important skills and techniques in building competitiveness. The practices play an important role in the planning, developing, implementing and evaluating strategic competitive policies that result in a competitive advantage. The study outlines the importance of management accounting practices in providing strategies that lead to the creation of a competitive advantage in an organisation. However, the conclusions are drawn on a conceptual level and a future empirical investigation is needed to substantiate these claims further. The study also sets a foundation for more focused research into the importance of modern management accounting practices in developing

a competitive advantage especially in the banking sector.

2013 English summary:
There is only limited academic attention paid to the topic of Private Equity Investments in Family Businesses although the topic is becoming increasingly relevant for both entity types. In order to advance the field, this study focuses on the organizational metamorphosis of Family Businesses as a response to a Private Equity investment. In specific, changes in performance and its potential determinants were researched by means of eight case studies. The results indicate a neutral to beneficial performance development when Private Equity companies acquired a majority stake and a neutral development in case of a minority investment. Analyses further revealed that the positive performance improvement correlated

with an organizational context that nurtured higher levels of individual discipline and stretch as well as organizational values that became aligned with market imperatives. German description: Investitionen von Private-Equity-Firmen in Familienunternehmen werden für beide Parteien zunehmend relevanter. Um diesem Gebiet Rechnung zu tragen, wurde die Veränderung der wirtschaftlichen Leistungsfähigkeit von Familienunternehmen im Zuge einer Private Equity Investition in acht Fallstudien untersucht. Die Resultate zeigen eine neutrale bis positive Veränderung der Leistungsfähigkeit wenn Private-Equity-Häuser eine Mehrheitsbeteiligung in Familienunternehmen erwerben. Bei

Minderheitsbeteiligungen konnte keine weitreichende Veränderung festgestellt werden. Weiterhin zeigen die Ergebnisse, dass die untersuchten Mehrheitsbeteiligungen einen Kontext entwickeln, welcher das individuelle Leistungsverhalten des Managements zu einem

höheren Masse fordert. Dies beruht vor allem darauf, dass sich jene Firmen zunehmend Umwelt- und Marktbedingungen öffnen und neue Operationsweisen adaptieren.
