Research Anthology on School Shootings, Peer Victimization, and Solutions for Building Safer Educational Institutions Management Association, Information Resources 2020-09-10 Though decades ago school shootings were rare events, today they are becoming normalized. Active shooter drills have become more commonplace as pressure is placed on schools and law enforcement to prevent the next attack. Yet others argue the traumatizing effects of such exercises on the students. Additionally, violence between students continues to remain problematic as bullying pervades children's lives both at school and at home, leading to negative mental health impacts and, in extreme cases, suicide. Establishing safer school policies, promoting violence prevention programs, building healthier classroom environments, and providing better staff training are all vital for protecting students physically and mentally. The Research Anthology on School Shootings, Peer Victimization, and Solutions for Building Safer Educational Institutions examines the current sources of violence within educational systems, and it offers solutions on how to provide a safer space for both students and educators alike. Broken into four sections, the book examines the causes and impacts that peer victimization has on students and how this can lead to further violence and investigates strategies for detecting the warning signs. The book provides solutions that range from policies and programs that can be established to strategies for teaching nonviolence and promoting coexistence in the classroom. Highlighting a range of topics such as violence prevention, school climate, and bullying, this publication is an ideal reference source for school administrators, law enforcement, teachers, government and state officials, school boards, academicians, researchers, and upper-level students who are intent on stopping the persisting and unfortunate problem that is school violence.

Big Picture Pedagogy: Finding Interdisciplinary Solutions to Common Learning Problems Regan A. R. Gurung 2017-10-02 Take a big-picture look at teaching and learning. Building on existing pedagogical research, this volume showcases the scholarship of teaching and learning (SoTL) across the disciplines--and takes it in a new direction. In each chapter, interdisciplinary teams of authors address a single pedagogical question, bringing each of their home discipline's specific literature and methodologies to the table. The result is a fresh examination of evidence-based practices for teaching and learning in higher education that is intentionally inclusive of faculty from different disciplines. By taking a closer, more systematic look at the pedagogies used within the disciplines and their impacts on student learning, the authors herein move away from more generic teaching tips and generic classroom activities and toward values, knowledge, and manner of thinking within SoTL itself. The projects discussed in each chapter, furthermore, will provide models for further research via interdisciplinary collaboration. This is the 151st volume of this Jossey-Bass

higher education series. It offers a comprehensive range of ideas and techniques for improving college teaching based on the experience of seasoned instructors and the latest findings of educational and psychological researchers.

Handbook of Research on New Literacies Julie Coiro 2014-04-04 Situated at the intersection of two of the most important areas in educational research today — literacy and technology — this handbook draws

on the potential of each while carving out important new territory. It provides leadership for this newly emerging field, directing scholars to the major issues, theoretical perspectives, and interdisciplinary research pertaining to new literacies. Reviews of research are organized into six sections: Methodologies Knowledge and Inquiry Communication Popular Culture, Community, and Citizenship: Everyday Literacies Instructional Practices and Assessment Multiple Perspectives on New Literacies Research FEATURES Brings together a diverse international team of editors and chapter authors Provides an extensive collection of research reviews in a critical area of educational research Makes visible the multiple perspectives and theoretical frames that currently drive work in new literacies Establishes important space for the emerging field of new literacies research Includes a unique Commentary section: The final section of the Handbook reprints five central research studies. Each is reviewed by two prominent researchers from their individual, and different, theoretical position. This provides the field with a sense of how diverse lenses can be brought to bear on research as well as the benefits that accrue from doing so. It also provides models of critical review for new scholars and demonstrates how one might bring multiple perspectives to the study of an area as complex as new literacies research. The Handbook of Research on New Literacies is intended for the literacy research community, broadly conceived, including scholars and students from the traditional reading and writing research communities in education and educational psychology as well as those from information science, cognitive science, psychology, sociolinguistics, computer mediated communication, and other related areas that find literacy to be an important area of investigation.

Knowledge and Commitment Douwe W. Fokkema 2000-04-15 The authors present a new perspective on a wide range of issues in the study of literature and culture. Some of the topics discussed, such as interpretation, canon formation, and literary historiography, belong to the traditional domain of literary studies. Others — cultural identity, convention, systems theory, and empirical methods — originate in the social sciences and are now being integrated into the humanities. By referring to the work of authors as widely apart as Hayden White, Edward Said, Fredric Jameson, Michel Foucault, Jacques Derrida, Reinhart Koselleck, Pierre Bourdieu, Niklas Luhmann, Siegfried Schmidt, Norbert Groeben, and many others, the full complexity of the field of literary studies becomes apparent.The authors argue for a distinction between analysis of literary systems on the one hand and critical intervention on the other. By distinguishing between research and criticism, between knowledge and commitment, they offer new ways for literary studies as well as for cultural critique.

The Communication Effect Jeff Zwiers 2019-11-05 The "communication effect" is what happens when we

saturate our classrooms with authentic communication, which occurs when students use language to build up ideas and do meaningful things. For starters, authentic communication deepens and increases language development, learning of content concepts and skills, rigor and engagement, empathy and understanding of others' perspectives, agency and ownership of core ideas across disciplines, and social and emotional skills for building strong relationships. And these are just the starters. With The Communication Effect, Dr. Jeff Zwiers challenges teachers in Grades 3 and up to focus less on breadth and more on depth by grounding instruction and assessment in authentic (rather than pseudo-) communication. This book provides: Ideas for cultivating classroom cultures in which authentic communication thrives Clear descriptions and examples of the three features of authentic communication: 1. building up key ideas (claims and concepts); 2. clarifying terms and supporting ideas; and 3. creating and filling information gaps Over 175 suggestions for using the three features of authentic communication to enhance twenty commonly used instructional activities across disciplines Additional examples of not-so-commonly-used activities that embody the three features Suggestions for improving four different types of teacher creativity needed to design effective lessons, activities, and assessments that maximize authentic communication Our students deserve to get the most out of each minute of each lesson. Authentic communication can help. As you read The Communication Effect and apply its ideas, you will see how much better equipped and inspired your students are to grow into the amazing and gifted people that they were meant to become.

Design Solutions for Adaptive Hypermedia Listening Software Turel, Vehbi 2021-06-18 Adaptive hypermedia listening software enables materials writers to combine and deliver a wide range of digital elements on the same digital computer platform more efficiently. Such a combination and delivery provides a multidimensional, multi-sensory digital environment in which rich, efficient, instant, comprehensible, optimum, and meaningful input and feedback can be presented effectively and efficiently. Moreover, language learners' attention can be drawn to forms and meanings in input. Such aspects correspond with different theories and hypotheses of language learning and teaching. This presents users/learners with an environment that is easy to use, tension-free, and optimal during self-study. However, to be able to design and develop cost effective and professional adaptive hypermedia listening software, there are certain scientific educational findings and implications that need to be implemented at every single stage. To have access to such vital findings is not so easy, and research must address this area. Design Solutions for Adaptive Hypermedia Listening Software explores how to design and create technically and pedagogically sound and efficient interactive adaptive hypermedia listening software for language learners in any language. The chapters will cover learner strategy tools, the effectiveness of this technology, best practices in adaptive hypermedia listening software, and the benefits and challenges of this technology for language learning. It is ideal for companies, institutions, teachers, policymakers, academicians, researchers, advanced-level students, technology developers, and decision-making pertinent government officials interested in designing and developing multimedia listening environments for language learners.
