The Sound System Design Primer Josh Loar 2019-02-21

The Sound System Design Primer is an introduction to the many topics, technologies, and sub-disciplines that make up contemporary sound systems design. Written in clear, conversational language for those who do not have an engineering background, or who think more in language than in numbers, The Sound System Design Primer provides a solid foundation in this expanding discipline for students, early/mid-career system designers, creative and content designers seeking a better grasp on the technical side of things, and non-sound

professionals who want or need to be able to speak intelligently with sound system designers.

Everest Exposed George Band 2005 This is the riveting story of the first successful ascent of Mount Everest in 1953, of the early failed attempts that made it possible, and of the successful expeditions that followed. Led by John Hunt, the first expedition team included George Band, the author of this inspiring account. Published in association with the Mount Everest Foundation, the Alpine Club, and the Royal Geographical society, Band's account is a tribute to the courage and bravery of those who have attempted to climb the world's highest mountain.
