British Steam Locomotives Before Preservation Malcolm Clegg 2020-07-30 A pictorial history of the British locomotives now part of the national collection, detailing their working lives and their preservation. *British Steam Locomotives Before Preservation* covers the history in pictorial form of steam locomotives that are now preserved as part of the national collection. Those which can be found in private collections and the ones which adorn the various heritage railways which operate throughout Britain. The book looks at each subject both in its working life and during its subsequent preservation. The pictorial content covers a wide swathe of Britain during the years before the heritage locomotives were earmarked for preservation. Praise for *British Steam Locomotives Before Preservation* "The book does exactly what it says on the cover and is recommended for anyone with an interest in UK standard-gauge steam. The photographs include not only locomotives, but also trains in some very interesting settings, which adds to the enjoyment of a well-researched

offering. Recommended—Next one please!" —Ffestiniog Railway Magazine

Steam Railways Ammonite Press 2013-02-14 Even today, over 50 years after the last scheduled service was hauled by a steam locomotive in Britain, many people's abiding image of rail travel comes from that age of steam, a romantic view of big muscular locomotives, belching clouds of steam and smoke, hauling long, snaking trains through picturesque countryside to the sound of the great chuffing from the engine, the thunder of the wheels on the rails and the haunting notes of the whistle. All this, and the fact that engines came in so many different shapes and sizes, conspired to give steam locomotives personalities of their own, to make them seem almost as if they were alive - quite different from today's super-efficient, quiet, clean and anonymous electric trains. Britain's railway system is the oldest in the world, and British engineers pioneered the development of the steam locomotive along with iron and steel rails that permitted rapid expansion. They were pivotal in the worldwide adoption of railways, and steam became the driving force of industrial expansion in the 19th century. As the years passed, steam locomotives became ever more powerful and efficient, culminating in the record run of the LNER locomotive Mallard, which attained a speed of 126mph in 1938. In those days, before air travel became commonplace, steam railways were the crucial link to the coastal ports and the Continent, the USA and the world. Royalty, politicians and celebrities could be seen at London's Victoria station boarding luxurious boat trains pulled by gleaming, streamlined steam locomotives. Travel then was an

exciting adventure, and the steam train was where the adventure began. In this book, almost 250 photographs from the vast archives of Mirrormix provide a nostalgic and fascinating look back at the age of steam, from its heyday of the early 20th century to its demise in the 1950s and 1960s, and subsequent resurrection through the work of the many railway preservation groups.

Flying Scotsman Fred Kerr 2016-11-30 Built at Doncaster works in 1923 the Nigel Gresley designed then-A1 class Pacific (4-6-2) first entered service as No 1472. The new locomotive did not receive a name until it was sent for display at a Wembley exhibition in 1924, and then the name Flying Scotsman was chosen. The Legend was born. In 1928 the London North Eastern Railway (LNER) express steam locomotive hauled the first nonstop service from London to Edinburgh and in 1934 went on to break through the 100mph barrier. In addition to regularly hauling express trains for the LNER and later British Railways (BR), the Gresley steam icon has also traveled to, and worked passenger trains in, North America and Australia. Withdrawn by BR in January 1963 as BR No 60103, the locomotive was bought for preservation and soon became a regular sight on mainline specials and at preserved railways. The locomotive's history in preservation is an interesting if not chequered one, however stability is now assured as Flying Scotsman has rightly become a part of the national collection administered by the National Railway Museum (NRM). The excitement which surrounded the return to steam of Flying Scotsman in 2016, and the ongoing celebrity status afforded to the famous Gresley designed engine, are perchance confirmation of the fact that it is The World's Most Famous Steam Locomotive. The most famous phrase entered into locomotive preservation folklore when first broadcast by John

Noakes, a BBC TV Blue Peter presenter. A great many words have been written about the engineering specification and in service performance of Flying Scotsman. Accordingly, this keepsake publication simply uses carefully selected images, dating from the BR steam era to the present day, to celebrate the Return of the Legend. This publication includes a selection of QR Codes with links to items of film footage.
