Opportunities and Constraints of Land Management in Local and Regional Development

Erwin Hepperle 2018-09-17 Land Management is normally embedded in a complex legal context, which frequently consists of contradictory

objectives, such as: strengthening of rural areas, satisfying the need for affordable living and commercial space, protecting environment and health, supporting transport infrastructure development, and preserving the landscape. Land management can be understood as a process that comprises coordination of such activities while managing the use and the development of land resources. It can be constrained by the land use specifications resulting from spatial planning process. Along with this, the legal framework often contains generally formulated concepts and open standards, which provide a range of opportunities for realization while balancing the different interests. In this process it is important if and how both constraints and opportunities are recognised by the actors. In this volume this topic is examined from various aspects: first the problems in promoting mutual understanding between researchers and the general public, but also among scientists of different disciplines; second the success requirements of land management instruments as well as unfortunate experience caused by land use changes; third covering land management costs by absorbing value increase and other trade off aspects; and fourth supporting land management by providing geodata with low-cost methods.

Die Digitalisierung frisst ihre User Anabel Ternès 2018-05-22 Wie ein gefräßiges Ungeheuer verleiht sich die Digitalisierung Lebensbereich für Lebensbereich, Wirtschaftszweig für Wirtschaftszweig ein. Ein regelrechtes Datenzeitalter steht uns bevor. Die digitale Revolution ist nicht mehr aufzuhalten, und die nächste Stufe der digitalen Vernetzung ist bereits in vollem Gange. Das Internet der Dinge zieht aus den Labors in den Alltag der Konsumenten. Der neue "Homo connectus" lebt in einer schönen neuen Welt, die wie durch Geisterhand sich öffnende Türen und Fenster verspricht, die heimische Heizungsanlage steuert, die Einkaufsliste über die Lücken im Kühlschrank erstellt und die Großmutter beim Blick in den Spiegel daran erinnert, die Tablette für die Nacht einzunehmen. Die freundliche Stimme aus dem Lautsprecher, die auf alle Fragen eine Antwort weiß, auf Wunsch Musik spielt oder auch das Wetter am Urlaubsziel recherchiert, ist ein neues Familienmitglied. Doch sind erst einmal alle

Geräte miteinander verbunden, bilden sie für den geschickten Hacker eine riesige Armee, mit deren Hilfe er den Sicherheitsapparat ganzer Weltmächte zusammenbrechen lassen kann. Die Sicherheit des Internets ist in Gefahr. Aus den kleinen Dingen, die das Leben angenehmer machen sollen, wird eine mächtige Cyberwaffe. Und die freundliche Stimme aus dem Lautsprecher hat all die Gespräche, auch wenn sie noch so intim waren, aufgezeichnet und ausgewertet: Der User begibt sich freiwillig in die absolute Kontrolle von Weltkonzernen. Dieses Buch hat nicht den Anspruch, die Zukunft vorauszusagen - was auch ziemlich vermessen wäre. Aber es soll helfen, in der nahen Zukunft einen vernünftigen und möglichst sicheren Umgang mit der digitalen Welt zu ermöglichen. Denn nur wenn man weiß, was hinter den Apps und Gadgets der smarten Welt steckt, was Daten wirklich bedeuten und wie wir uns durch schlaue Anwendungen schützen können, können wir uns selbstverständlich und furchtlos in ihr bewegen. Damit wird das Buch zu einem umfangreichen Praxisleitfaden für alle, die sich über das Leben in der digitalen Welt Gedanken machen.

Advances in Home Care Technologies K.J. Turner 2012-10-10 An ageing population is burdening social and healthcare services around

the world, and this problem is likely to get worse as the percentage of older people continues to rise. Many governments are already responding to this challenge, and a key element in their strategies is the development and deployment of computer-based telecare and telehealth technologies to support care at home in a cost-effective manner. Human involvement in care continues to be central, but home care technologies can offer reassurance, and support routine aspects, to the benefit of all concerned. This book provides an up-to-date overview of key advances in the relevant technology, with an in-depth examination of the latest research in various home care technologies by experts in the field. The book mainly discusses the results of the Mobilising Advanced Technologies for Care at Home (MATCH) project, co-ordinated by the University of Stirling in Scotland, but work on related projects is also included. The book will be of interest to all researchers and practitioners in the fields of telecare and telehealth, policymakers in these areas, and providers of social and healthcare with an interest in technology.

The Business of Influence Philip Sheldrake

2011-05-04 Media has most definitely evolved, as have the ways in which we contemplate, design, communicate and execute strategy. And rather than technological evolution, we're plainly in the midst of a technological revolution. We have no choice then but to reframe marketing and PR in the context of 21st Century technology, 21st Century media and disintermediation, and 21st Century articulation of and appreciation for business strategy. "Today, every organization is in the influence business. We influence customers to buy from us, employees to work for us, and the media to write about us. Gone are the days when you could be your own island. Now, to be successful, you need to live within the influence ecosystem and that requires a change of mindset. Fortunately, Philip Sheldrake will show you how." David Meerman Scott, bestselling author of *The New Rules of Marketing & PR* and the new hit *Real-Time Marketing & PR*
