This new and expanded edition builds upon the first edition's accessible and comprehensive overview of the interdisciplinary field of sustainability. The focus is on furnishing solutions and equipping the student with both conceptual understanding and technical skills for the workplace. Each chapter explores one aspect of the field, first introducing concepts and presenting issues, then supplying tools for working toward solutions. Techniques for management and measurement as well as case studies from around the world are provided. The second edition includes a complete update of the text, with increased coverage of major topics including the Anthropocene; complexity; resilience; environmental ethics; governance; the IPCC's latest findings on climate change; Sustainable Development Goals; and new thinking on native species and novel ecosystems. Chapters include further reading and discussion questions. The book is supported by a companion website with links, detailed reading lists, glossary, and additional case studies, together with projects, research problems, and group activities, all of which focus on real-world problem solving of sustainability issues. The textbook is designed to be used by undergraduate college and university students in sustainability degree programs and other programs in which sustainability is taught.

Einführung in die Organische Chemie William H. Brown 2020-09-02

Das international bewährte Lehrbuch für Nebenfachstudierende jetzt erstmals in deutscher Sprache - übersichtlich, leicht verständlich, mit vielen Beispielen, Exkursen, Aufgaben und begleitendem Arbeitsbuch. Wie sind Moleküle aufgebaut? Wie bestimmt man die Struktur einer organischen Verbindung? Was sind Säuren und Basen? Welche Bedeutung hat Chiralität in der Biologie und Chemie? Welche Kunststoffe werden in großen Mengen wiederverwertet? Was ist der genetische Code? Dieses neue Lehrbuch gibt Antworten auf diese und alle anderen wesentlichen Fragen der Organischen Chemie. Die wichtigsten Verbindungsklassen, ihre Eigenschaften und Reaktionen werden übersichtlich und anschaulich dargestellt. Zahlreiche Praxisbeispiele, eine umfassende Aufgabensammlung und kompakte Zusammenfassungen am Ende eines jeden Kapitels erleichtern das Lernen und Vertiefen des Stoffes. Mit seinem bewährten Konzept und erstmals in deutscher Sprache ist der "Brown/Poon" eine unverzichtbare Lektüre für Dozenten und Studierende an Universitäten und Fachhochschulen in den Disziplinen Chemie, Biochemie, Biologie, Pharmazie, Medizin, Chemieingenieurwesen und Verfahrenstechnik. Zusätzlich zum Lehrbuch ist ein kompaktes Arbeitsbuch erhältlich, das ausführliche Lösungswege zu den Aufgaben im Lehrbuch enthält. Auch als preislich attraktives Set erhältlich.

International Classification of Financial Reporting Christopher Nobes 1992-01-01 With the growing integration of the international economy the international differences in financial reporting practices have never been so important in multinational business. Recent reforms in International Accounting Standards, combined with the continuing European harmonization, have placed this topic high on the current agenda of both researchers and of business analysts actively concerned with international accounting practice. This new, updated edition of Christopher Nobes' International Classification of Financial Reporting examines the causes and nature of the differences between financial

reporting practices in different countries, charting all the many significant developments to have taken place through the 1980s. The relevant research published during this period is discussed, alongside the effects of the regulatory changes that have taken place. Improvements in the

existing system of classification in financial reporting are proposed in the light of the accelerated process of harmonization currently taking place. The resulting volume is an indispensable source for academics and professionals in international accounting and for all who are engaged in the process of European harmonization.
